

NutriVision AI — Weekly Nutrition Performance Review

Subject: **Rahul Sharma** | Generated on **September 18, 2026** | Protocol: ICMR-NIN 2024 & FAO Guidelines

Nutritional Intake Summary (Weekly)

Nutritional Metric	Logged Amount	Daily Target	Adherence Status
Total Calories	2050 kcal	2150 kcal	Within Target
Crude Protein	102.5 g	110 g	93% Target Met
Effective Bioavailable Protein	84.0 g	Quality Modeled	Tissue-Effective
Total Carbohydrates	230.0 g	240 g	Balanced Energy
Dietary Fats	58.0 g	60 g	Optimal Lipids
Dietary Fiber	26.0 g	30 g	Prebiotic Support
Nutrition Adherence Score	84 / 100	Target > 80	High Consistency

Meal Consistency & Habit Tracking

- Breakfast Logged: **28 / 30 days** (93% adherence)
- Lunch Logged: **30 / 30 days** (100% adherence)
- Dinner Logged: **29 / 30 days** (97% adherence)
- Afternoon/Evening Snacks Logged: **22 / 30 days**

Primary Dietary & Protein Contributors

Top logged foods in order of frequency: **Whole Wheat Chapati / Roti, Yellow Dal Tadka, Fresh Paneer Bhurji, Boiled Eggs, Homemade Curd, Roasted Chana**. Bioavailable protein was predominantly driven by dairy leucine and egg albumin.

Potential Dietary Patterns & Gaps

- **Elemental Iron & Ascorbic Acid Synergy:** When consuming non-heme iron from lentils (dal, chana), combine with vitamin C (lemon juice, amla) to enhance intestinal absorption. Avoid tea or coffee within 60 minutes of main meals to reduce polyphenol binding.
- **Dietary Fiber Satiety:** Consuming fiber at 26g/day provides adequate digestive motility. Adding raw salad (cucumbers, carrots, tomatoes) prior to lunch will easily bridge the remaining 4g fiber target.

NutriVision AI Synthesis & Next Practical Actions

Your nutritional discipline reflects high consistency with your current fitness goal. Energy intake remained comfortably within target limits. To elevate lean body mass retention, maintain at least 30g protein per major meal (lunch and dinner) by pairing legumes with dairy or eggs.

Action 1: Add 1 cup of curd or buttermilk to lunch for an immediate +8g bioavailable protein boost.

Action 2: Include 1 bowl of raw sliced salad with lemon before dinner to meet your 30g daily fiber goal.

Action 3: Maintain daily hydration above 2.5L to optimize amino acid metabolism and workout recovery.

MEDICAL & CLINICAL SAFETY NOTICE: NutriVision AI generates evidence-grounded educational nutrition tracking based on user-provided logs and reference databases (ICMR-NIN / FAO).
